

Sea Frost BDxpx A/W

12 or 24 Volt DC High Capacity Refrigerator/Freezer

BDxpx A/W
Complete (2) Plate Freezer
System
\$ 2,250.00

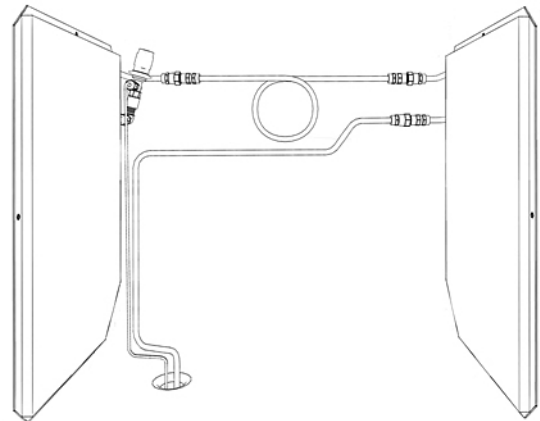

The Sea Frost BDxpx A/W is the highest capacity BD system. Ideally suited for low temperature freezers and the largest refrigerators. The BDxpx A/W is coupled with stainless steel direct evaporator plates that can be custom sized for optimum performance.

Ducted air and selectable water-cooling give the BDxpx A/W excellent efficiency and allow maximum capacity operation in all installations.

The BDxpx A/W is fitted with a Danfoss®

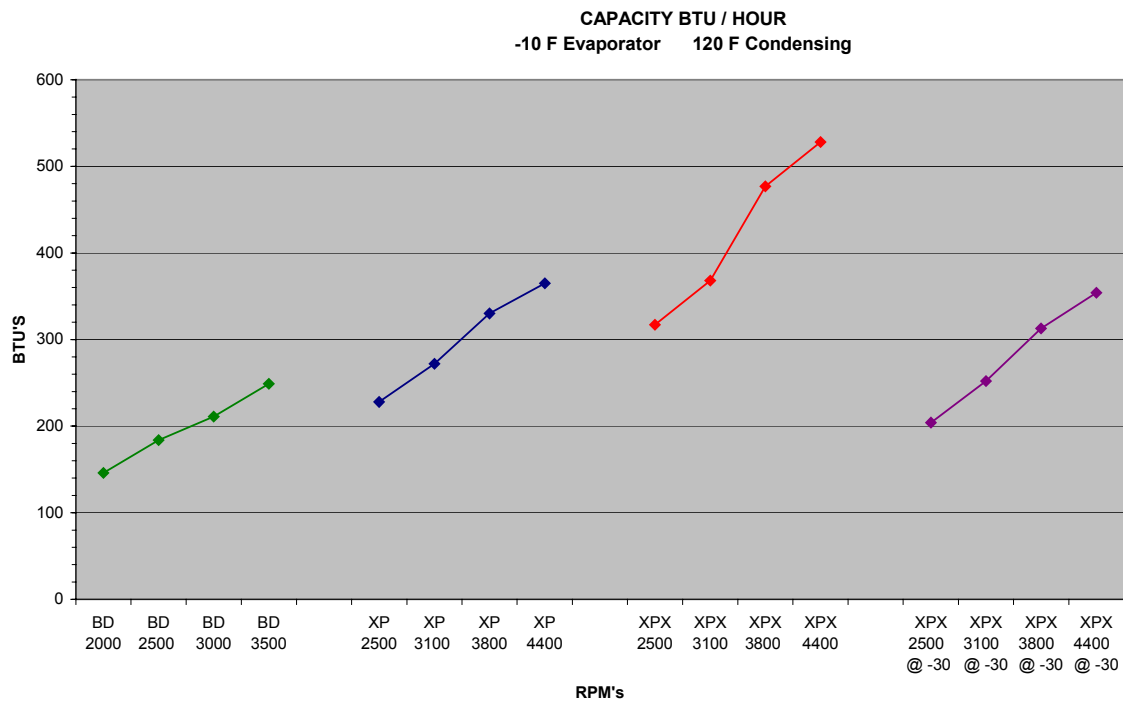

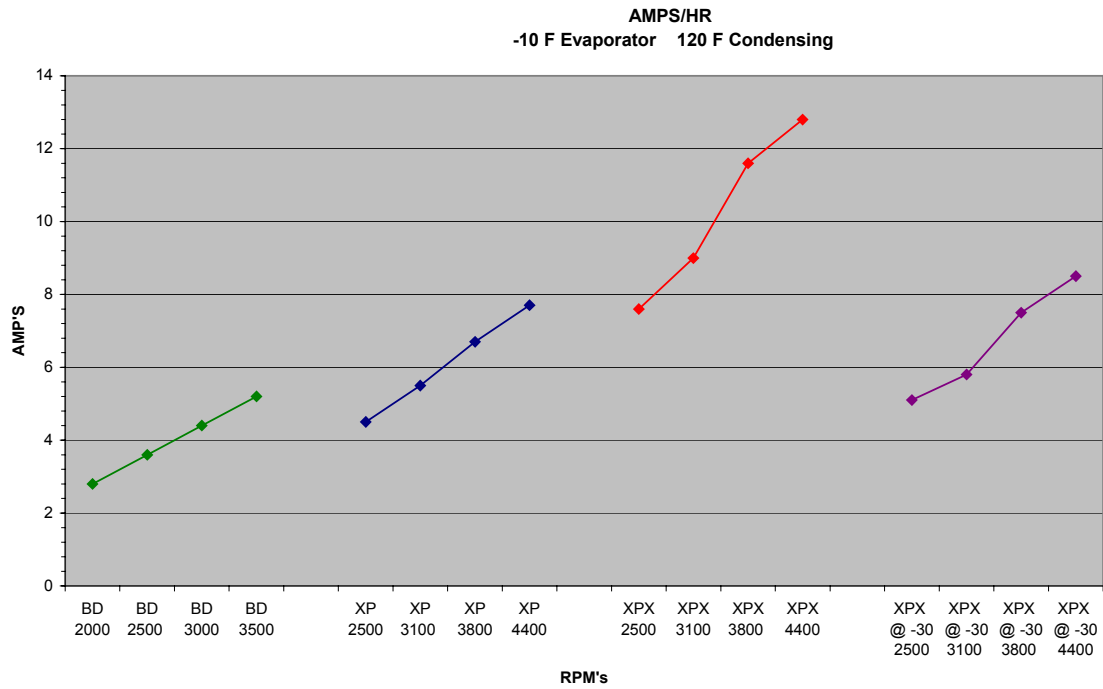

variable speed brushless hermetic compressor. Automatic speed control using AEO or optional manual speed control. All systems are pre-charged with refrigerant R-404a.

Two Plate Freezer Format

Condensing Unit Dimensions: 7.5 inches high,
15 inches wide, 9 inches deep. Weight: 19 lbs.

Comparison Data of 12-volt Air Cooled Models in Tropical Conditions

BDxpx A/W System Includes: Pre-Charged Air/Water Cooled Condensing Unit, Expansion Valve, Remote Thermostat, (2) Stainless Steel Evaporator Plates with line sets. \$ 2250.00
Options: Electronic Thermostat Thermometer, Ice Trays, Speed Control, and Water Pump.
