

Sea Frost Bait Freezer

The Sea Frost Bait Freezers (BF series) are 110 or 220 volt A.C. powered compressor systems capable of maintaining an insulated cabinet at freezing temperatures when operating from a continuous power source. BF units are available with ducted air cooling, or air and water cooling. The BF4 is available in water cooled only. Both the remote mounted compressor and condenser are housed in a compact, rust-proof, fiberglass housing. The system is connected via copper lines to the boat's insulated cabinet fitted with our 1/2" thick stainless steel direct evaporator plates or with a hidden cooling coil (if the installation is new construction). The temperature is controlled with a digital, low-voltage thermostat.

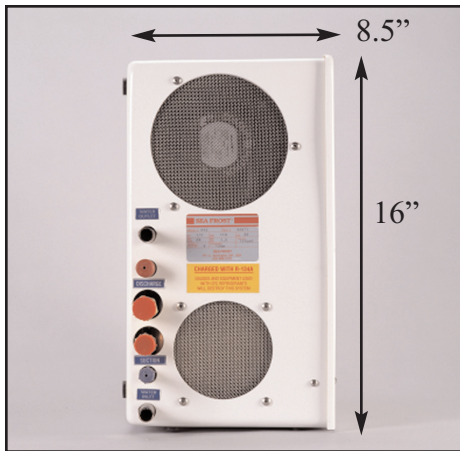

- ❄ Compact
- ❄ Bulkhead or Shelf Mounted
- ❄ Marine Grade Materials
- ❄ R-134a Refrigerant with Dedicated Service Ports
- ❄ Low Voltage Digital Thermostat Circuit
- ❄ Custom Sized Stainless Steel Direct Evaporator Plates
- ❄ Adaptable for Catch Box Chiller or Galley Freezer/Refrigerator

Bait Freezer Specifications

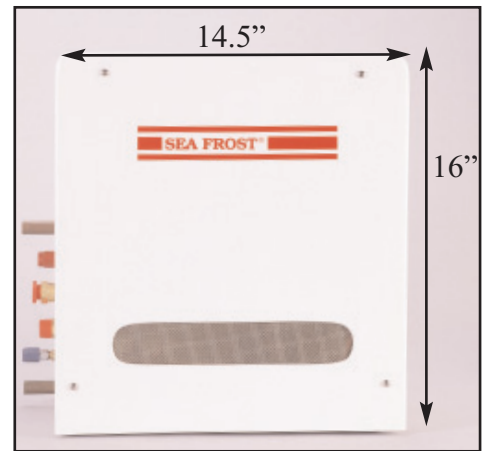

Custom Stainless Steel Plates

Bait Freezer plates are a polished stainless steel, direct evaporator design. The typical freezer installation requires two plates. Plates are 1/2 inch thick with sealed backs and are available in custom sizes with stainless steel or copper refrigerant tubes.

Available Models

BF 1

A.C. amp draw: 4 at 110 volts; Horsepower: 1/4 ; Dimensions: 16" high; 14.5" wide; 7.5" deep; Compressor unit weight: 36 lbs.; Cooling: Ducted air

BF 2

A.C. amp draw: 6 at 110 volts; Horsepower: 1/4; Dimensions: 16" high; 14.5" wide; 8.5" deep; Compressor unit weight: 42 lbs.; Cooling: Air and water; (Remote water pump required)

BF 3

A.C. amp draw: 6 at 110 volts; Horsepower: 3/8; Dimensions: 16" high; 14.5" wide; 8.5" deep; Compressor unit weight: 42 lbs.; Cooling: Air and water; (Remote water pump required)

BF 4

A.C. amp draw: 8 at 110 volts; Horsepower: 1/2; Dimensions: 14.5" high; 14.5" wide; 7.5" deep; Compressor unit weight: 42 lbs.; Cooling: Water; (Remote water pump required)
