

## Sea Frost BDxpx A/W

### 12 or 24 Volt DC High Capacity Refrigerator/Freezer

**BDxpx A/W**  
Complete (2) Plate Freezer  
System  
\$ 2,310.00

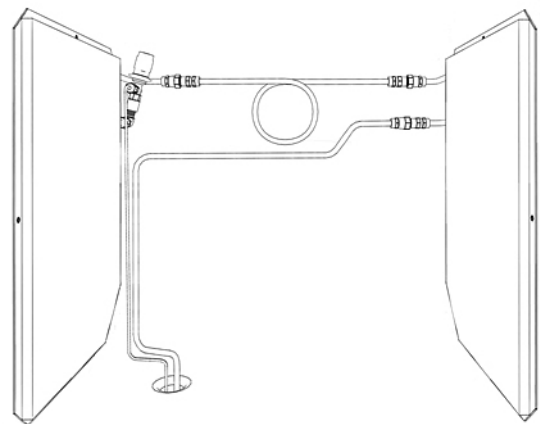

The Sea Frost BDxpx A/W is the highest capacity BD system. Ideally suited for low temperature freezers and the largest refrigerators. The BDxpx A/W is coupled with stainless steel direct evaporator plates that can be custom sized for optimum performance.

Ducted air and selectable water-cooling give the BDxpx A/W excellent efficiency and allow maximum capacity operation in all installations.

The BDxpx A/W is fitted with a Danfoss®

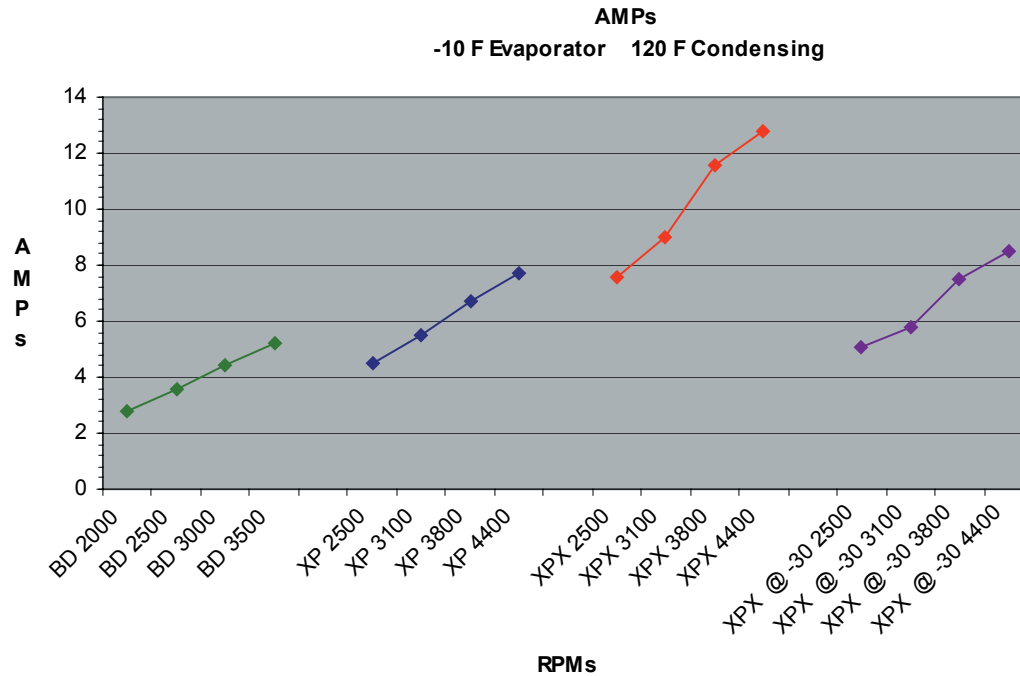

variable speed brushless hermetic compressor. Automatic speed control using AEO or optional manual speed control. All systems are pre-charged with refrigerant R-404a.

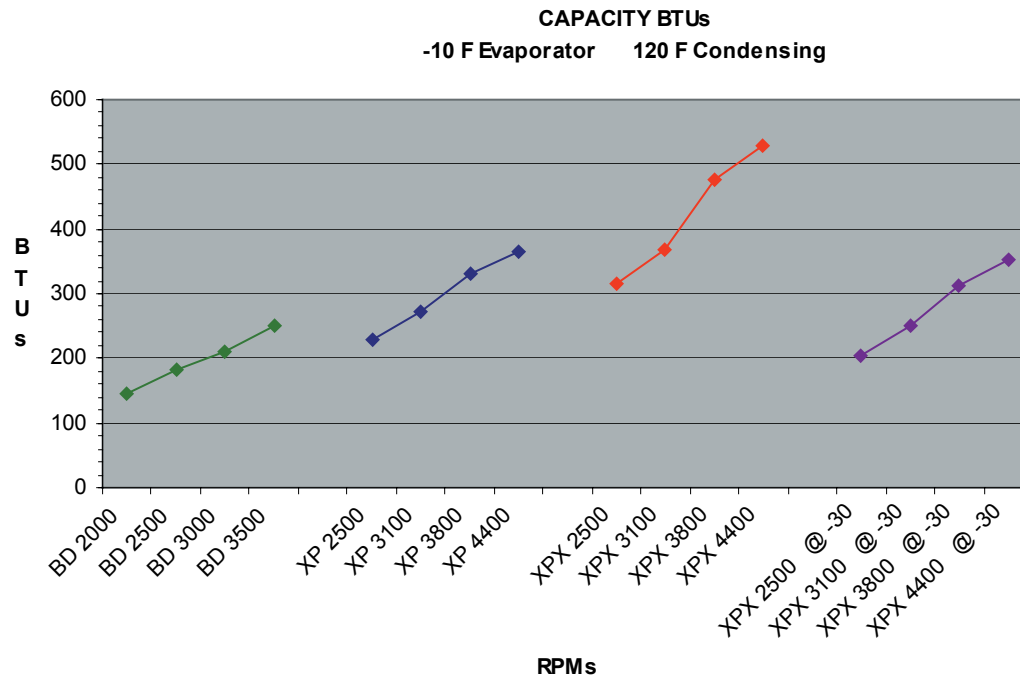

Two Plate Freezer Format

Condensing Unit Dimensions: 7.5 inches high,  
15 inches wide, 9 inches deep. Weight: 19 lbs.

## Comparison Data of 12-volt Air Cooled Models in Tropical Conditions

**Note:** Far right graphs shows the BDXPXAW operating at -30 F.

**BDxpx A/W System Includes:** Pre-Charged Air/Water Cooled Condensing Unit, Expansion Valve, Remote Thermostat, (2) Stainless Steel Evaporator Plates with line sets. \$ 2310.00  
**Options:** Electronic Thermostat Thermometer, Ice Trays, Speed Control, and Water Pump.
